

WIREL_oCK

Triangular Tie

WIREL_oCK Tri-Ties are used with adjustable veneer anchor systems.

Tri-Ties are used in conjunction with Veneer Anchors for tying brick veneer to metal studs and masonry to steel columns.

PRODUCT DATA

WIREL_oCK Tri-Ties transfer the load between the brick and the structural framing of the building.

- Veneer Anchors & Triangle Ties permit the construction of interior masonry wythes and other backings prior to the construction of exterior facing wythes, thus allowing the structure to be enclosed faster.
- Triangle Ties should not require maintenance if installed in accordance with specifications and instructions.
