

WIREL_oCK

Plastic Louvered Weep Vent

WIREL_oCK Plastic Louvered Weep Vent allows air to pass through freely and water to weep out while inhibiting reverse passage of water.

The Weep Vent is manufactured from a polyvinyl chloride compound specifically designed for continuous exposure to weathering.

PRODUCT DATA

- Provides adequate opening for immediate air pressure equalization
- Allows air to circulate into the cavity so the cavity can dry quickly
- Protective strips on top prevent mortar droppings from clogging opening
- Provides a neat & attractive appearance
- Impedes passage of insects, rodents & rain water
- Can be used at the top of the wall to improve air circulation in the cavity
- Extremely durable for optimal long-term performance
- Very lightweight and easy to handle
- Fast and easy to install
- Very cost-effective
